ABOUT ME

I'm Kyaw Naing Win and software development is my passion. Since I first started tinkering with computers, I've been hooked on coding. Every line of code feels like a step towards bringing my ideas to life and making a difference. I'm always learning and adapting to keep up with the fast pace of the industry. Collaboration and purpose drive me forward, as I aim to innovate and share my love for technology with others.

PROJECT EXPERIENCE

Food Box Delivery Website

- Designed and developed a user-friendly website dedicated to food box delivery services.
- Served as the Frontend Developer, leveraging HTML, CSS, and Bootstrap.
- Improved the user experience and facilitated smooth online ordering processes.

Financial Website

- Developed and executed a software platform utilizing the Spring MVC framework.
- Ensured secure storage of user data and transaction records within a MySQL database.
- Incorporated sophisticated functionalities such as currency conversion tools and customized investment quoting mechanisms.

Go Wild Wildlife Park Database Management

- Developed a MySQL-based relational database for managing animal and keeper records.
- Crafted a visually appealing interface utilizing HTML and CSS.
